Ensuite pliez de sorte à ramener le bord inférieur long de la ligne de pliage précédente.

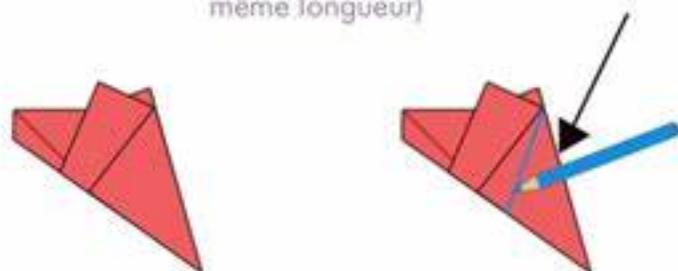

Pliez en faisant coïncider le bord droit avec le bord gauche

Retournez votre pliage

Tracez ensuite un trait au crayon, de sorte que le triangle obtenu soit isocèle (2 côtés même longueur)

Puis découpez en suivant ce trait

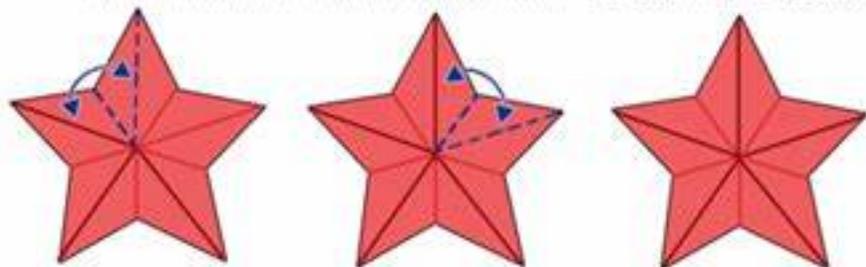

Vous obtenez alors un triangle, que vous dépliez

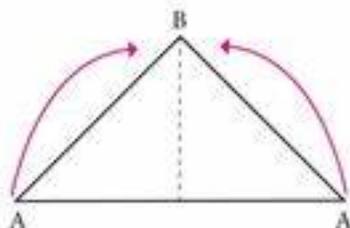

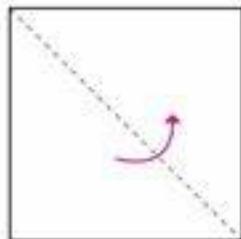

Ensuite pliez de proche en proche afin de donner le relief à votre étoile

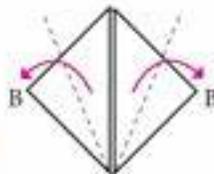

Et admirez le résultat!

# Pliage de la "Grue" en Origami

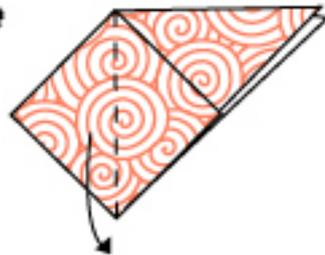

1° Pliez une feuille carrée en 2, en suivant la diagonale.

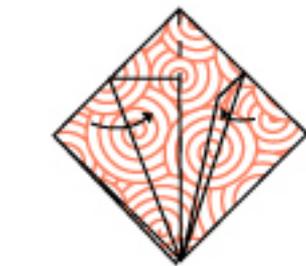

2° Pliez-la encore en 2 selon la hauteur de l'hypoténuse.

3° Ouvrez le triangle supérieur et applatissez-le en forme de carré.

4° Retournez l'objet et applatir le deuxième triangle.

5° Rabattre vers le milieu les rabats supérieurs droits et gauche, sur le dessus.

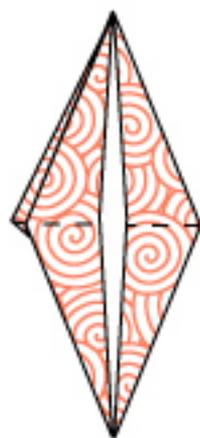

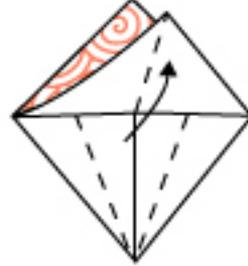

5° Retournez l'objet et recommencez l'opération de l'autre côté.

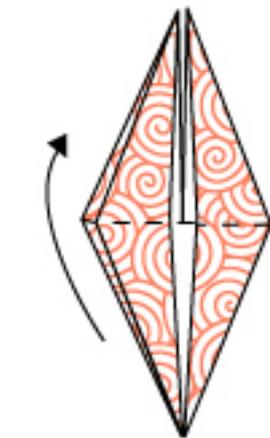

7° Pliez vers le bas le triangle du haut, puis relâchez.

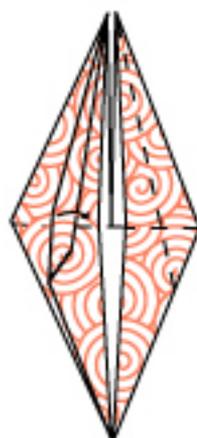

8° Ouvrez les rabats extérieurs. Utilisez les marques en pointillé sur le dessin pour lever la pointe du bas vers le haut, pour obtenir un losange.

9° Recommencez la même opération au dos.

9° Tournez le losange à 180°

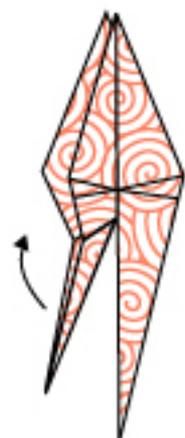

11° Rabattre les angles vers la ligne médiane, en suivant les pointillés.

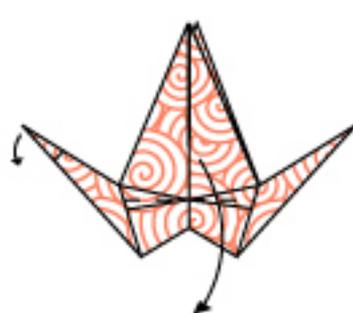

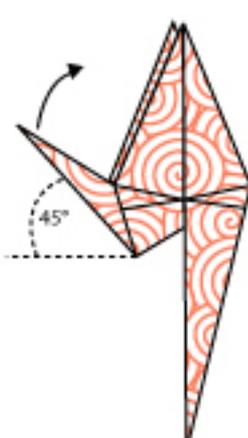

12° Recommencez la même opération au dos.

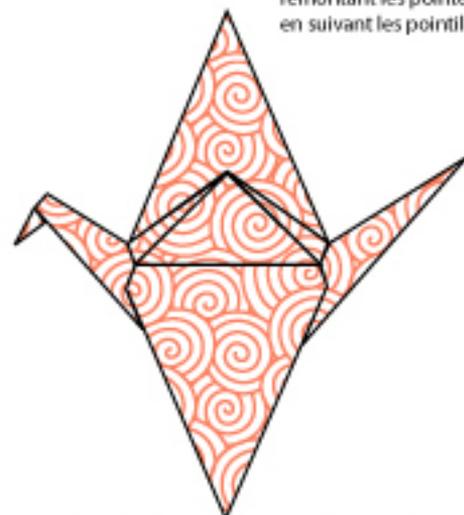

13° Retournez le pliage. Marquez des plis en remontant les pointes et en suivant les pointillés.

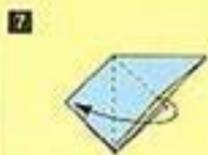

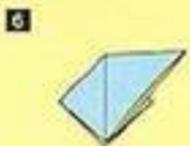

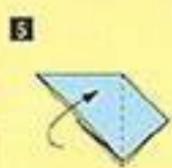

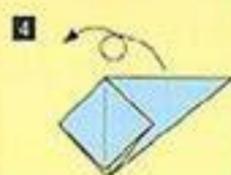

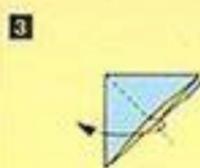

14° Ouvrez sur le côté et pliez pour que les pointes s'insèrent à l'intérieur du corps de l'oiseau, à 45°.

17° Rabattre une des pointes vers l'intérieur pour former le bec de l'oiseau.

18° Tirez les ailes vers le bas pour les ouvrir et gonfler le corps de l'oiseau.

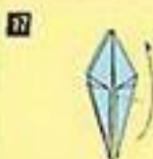

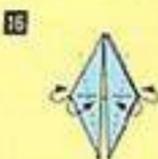

**11** \*Voyez au bas de la page

**13** Répétez les étapes 1 à 10

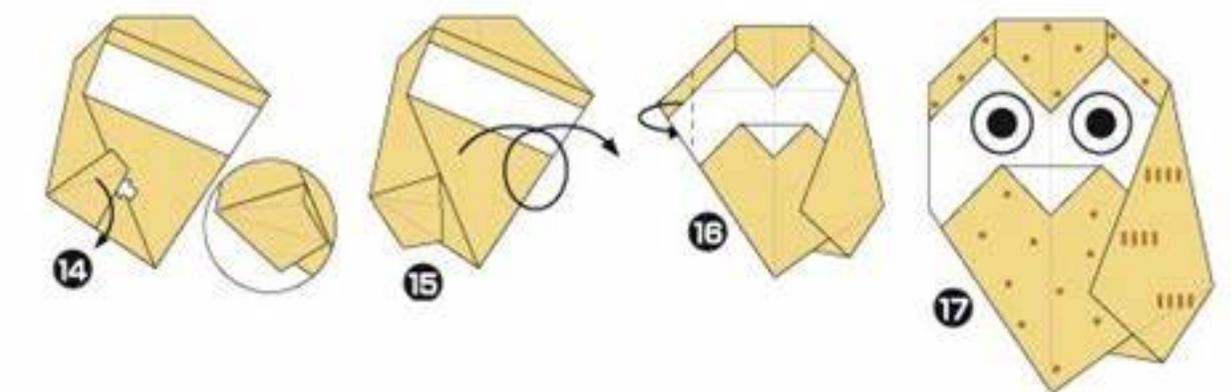

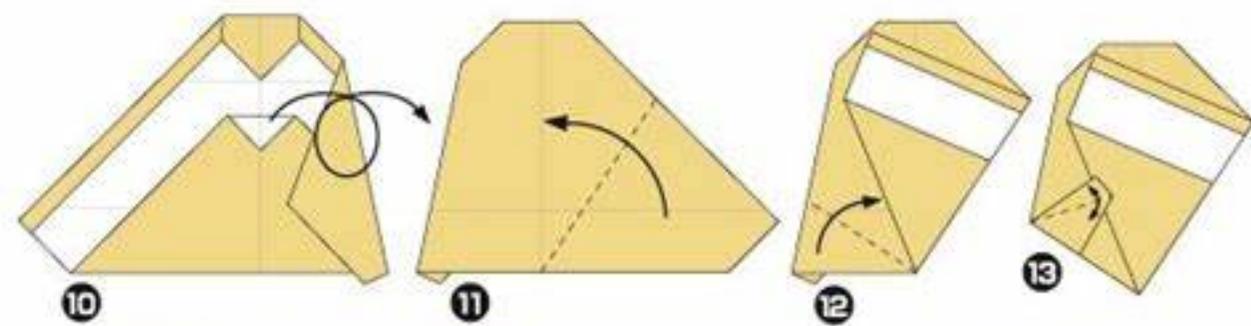

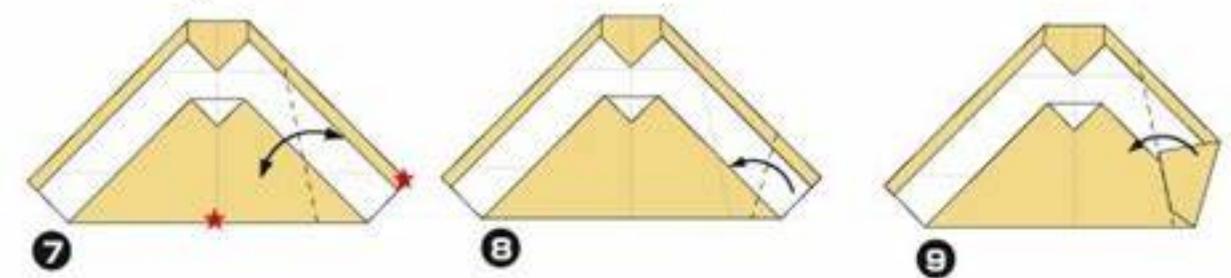

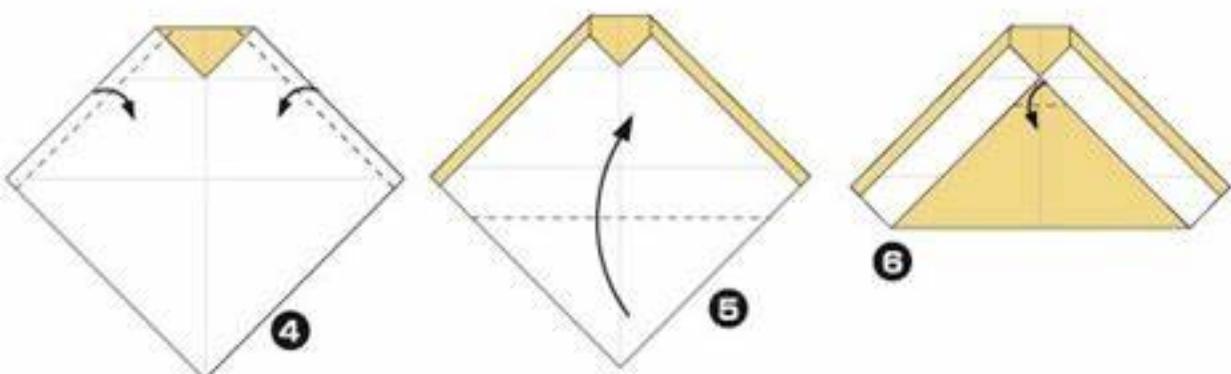

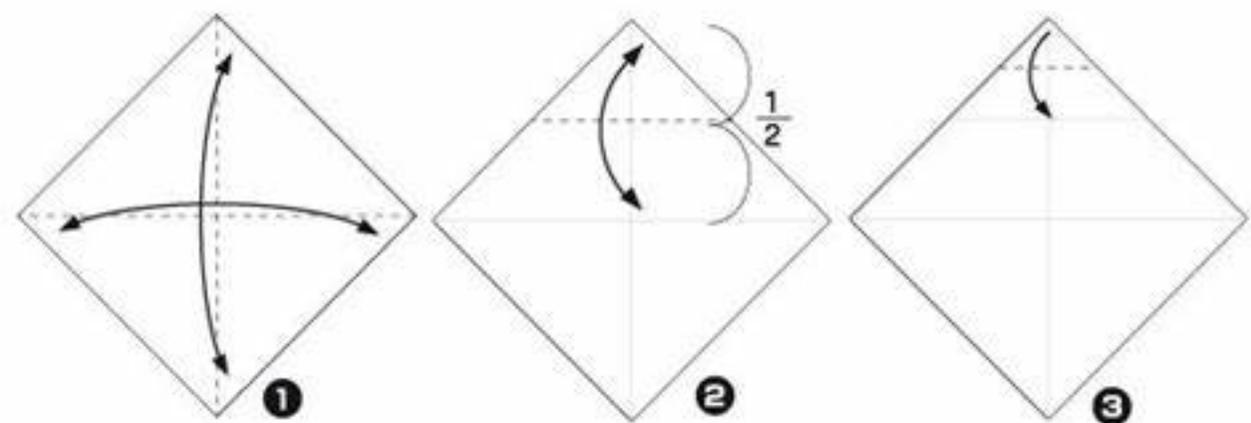

**14** Comme à l'étape 10

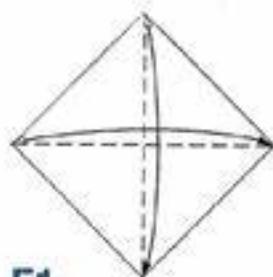

\* Instructions pour 11

Tirer la pointe inférieure de la feuille du dessous vers le haut, en pliant sur la ligne pointillée afin de former une pointe au sommet, et en pliant les côtés vers l'intérieur.
